

Coffee-Activity Diagram with Swimlanes Example

Barbara Okupna | February 2, 2022

Description

Activity diagrams are a type of UML diagrams. Use them to display the functionalities of various activities and flows in business processes and software systems.

Swimlanes are used to show partitioned activities and identify who is responsible for performing each activity. Use Lucidchart's UML State/Activity shape library to create your own activity diagram.

To customize this template, click on any shape and type the information you would like to include. Add, remove, and arrange shapes as necessary.
